Initially, I was designated as leader of Workpackage (WP2.5) and to contribute to WP2.1 and WP2.2. However, no project funds were allowed to be transferred to the USA for my use. Therefore, my involvement was limited to providing advice and suggestions to partners at the Agricultural University of Athens and the Aristotle University of Thessaloniki relating to WP2.1 and WP2.2, and to participating in some meetings. Studies under the above WP provided quantitative data for the attachment and biofilm formation by <i>Escherichia coli</i> O157:H7 on food-contacts surfaces, as well as for its transfer from surface-inoculated beef steaks to their interior and subsequently to tenderized non-inoculated beef steaks. The results should contribute to the improvement of beef safety through in risk assessments. There was no private funding involved.

The research (co-)funding I received from the private sector in the latest full budget year, and for the areas covered by the Panels, does not exceed 25% of the total annual research budget that is managed by me.
